

Chapter 2 Outline

Physical Security and Perimeter Control
 Perimeter Barriers
 Lighting
 Parking Areas
 Glass Protection
Surveillance
 Closed-Circuit Television
Communication Systems
Alarm Systems
 Local Alarms
 Contact Alarms
 Remote Alarms
 Safety Alarms
Safety Equipment
 Smoke Detectors
 Fire Extinguishers
 Carbon Monoxide Detectors
 Sprinkler Systems
 Accident Prevention Signs
Guestroom Security
 Locks
 Biometrics
 Secondary Access-Limiting Devices
 Viewports
 Room Communications
 In-Room Security Information

Competencies

1. Identify critical elements of and concerns related to physical security and perimeter control equipment. (pp. 104–125)
2. Explain the importance of communication systems for security, describing the types of equipment available and the key considerations when evaluating such systems. (pp. 125–129)
3. Explain the features and benefits of various alarm systems. (pp. 130–133)
4. Describe various types of safety equipment and how they can help protect lodging properties and their staff and guests. (pp. 133–137)
5. Identify potential elements of guestroom security and describe their uses. (pp. 137–146)
